

Overview

The Blood & Tissue Center of Central Texas

Morgan, Recipient

The mission of The Blood and Tissue Center of Central Texas is to safeguard the community's gift of blood and tissue with uncompromising quality and excellence in customer service. The Center is the exclusive provider and guardian of the community blood supply for more than 37 medical facilities in a ten-county service area of Central Texas, collecting over 200 whole blood donations each day at The Center's mobile blood drives and fixed-site donor centers.

Central Texans use approximately 60,000 whole blood donations a year. These donations are tested extensively to assure suitability for transfusion and processed into life-saving components: red blood cells, plasma and platelets; all of which go to help up to 165,000 patients.

The Blood and Tissue Center of Central Texas is a 501 (c) (3) non-profit organization. The Center is licensed by the U.S. Food and Drug Administration, accredited by the American Association of Blood Banks and American Association of Tissue Banks, and is a proud member of America's Blood Centers.
